DAY 10: BUENOS AIRES / IGUASSU FALLS

Transfer to the airport to fly to Iguassu Falls. You are met on arrival and transferred to your hotel. Long before the Spanish explorer Don Alvaro Nuñez reached South America's greatest waterfall in 1541, the local Indians had named it Iguacu - meaning

great waters. Once seen, the falls - all 275 of them - are never forgotten. The two-mile wide curtain of water crashing 300 ft over a series of precipices into a spray-filled gorge constitutes the most spectacular sight of probably the whole of South America.

This afternoon, enjoy a walking tour of the falls from the Brazilian side. Cross the border into Brazil and proceed into the national park. A trail winds towards the falls populated by contis, long-tailed racoon-like creatures. At its end, an elevator provides speedy access to a viewing platform at the foot of the falls. Focal point of the falls, best seen from above, is the Devil's Throat, a horseshoe-shaped gully in mid-stream, over which seems to pour most of the Iguassu River.

All of a sudden, you run into breathtaking views of the Falls. You will get lots of closer views at the different observation points, and more panoramic sights toward the end of the trail. The Lower Circuit requires more physical effort due to its stairs but it can be perfectly done if you take it nice and slow, catching your breath on the different viewpoints. On this trail you will also walk deep into the jungle, crossing streams and coming across local fauna. The Lower Circuit goes all the way down to the river, where the boat crosses over to San Martin Island. On the way down, there are balconies with marvelous bottom-up views

of the Falls. The second leg of the train ride leaves from Cataratas Station and goes to Garganta del Diablo Station.
